Profile

Ambitious and detail-driven Full Stack Developer with expertise in crafting responsive web experiences. Proficient in frontend (HTML, SASS, CSS, JavaScript, Material UI) and backend technologies (Python, Django, databases). Proven track record in project development and technical collaboration.

Work Experience

Frontend Developer, Rugged Software (2021)

- Translated design concepts into responsive web components using HTML, SASS, and CSS.
- Developed high-quality, production-ready code for efficient project delivery.
- Collaborated remotely with strong communication skills and met deadlines.

Developer Advocate, Strapi (2022)

- Organized engaging Twitter Spaces sessions, increasing followers and visibility.
- Reviewed and refined blog posts for the Write For The Community program.
- Provided prompt user support, enhancing product experience.
- Presented as a guest speaker, promoting Strapi and educating potential users.

Developer Advocate (2023)

- Led vibrant Discord community engagement, creating engaging content.
- Executed content plans aligning with project goals and community interests.
- Managed social media for a cohesive online presence.
- Contributed valuable insights in team meetings to refine strategies.

Backend Developer (Python/Django), Talosmart Technologies (2023-2024)

- Designed and developed scalable backend applications using Python and Django framework.
- Developed RESTful APIs using Django REST framework.
- Implemented database modeling and schema migration using Django ORM.
- Integrated third-party APIs for payment gateways, email services, and social media authentication.

Technical Skills

- Programming languages: Python 3.x
- Framework: Django 3.x
- Database: PostgreSQL, MySQL
- APIs: Django REST framework, GraphQL
- Deployment: Heroku, AWS
- Operating System: Linux, Ubuntu
